LANSERHOF
DERMA THERAPY 2025

HEALTHY SKIN – NEW ENERGY

As the largest organ of the human body, the skin plays an essential role in the detoxification process. Our medically oriented Derma treatments therefore form a key component of the Lanserhof Concept, aiming to help revitalise the skin and promote health at the highest level of medical care.

At our Lanserhof resorts, we use advanced technologies and methods to optimise the vital functions of the skin and the body. In close partnership with international cosmetic laboratories and medical professionals, we have developed a comprehensive range of Derma treatments that meet the highest medical standards.

In addition to a wide range of non-invasive, cosmetic treatments, we also offer a variety of medical services that have been developed in close collaboration with our Lanserhof doctors and selected dermatologists. Each treatment is individually tailored and continuously further developed by our Derma experts to suit the specific needs of your skin. We also take into account the duration of your stay at Lanserhof so we can ensure you leave with the best HEALTHY SKIN and brimming with NEW ENERGY. Our pursuit of innovation is what drives us to continually drive our treatments forward so we can offer you a holistic and innovative experience.

LANSERHOF LAB SIGNATURE FACIAL

Our Lanserhof Signature treatment is a deep-acting treatment combining highly active ingredients from the vegan Lanserhof Lab Skincare range. The combination of acupuncture massage, bio-cellulose masks and final care massage gives your skin the ultimate natural Lanserhof glow.

3D ANTI-AGING INTENSIVE TREATMENT

Revolutionary 3D anti-aging skin care concept combines three intelligently selected technologies in two treatment steps: Microdermabrasion to refine the complexion and the skin's structure; ultrasound treatment to deliver active ingredient complexes deep into the cutis; and Cell Premium microneedling to activate cell renewal and regeneration.

- (1) Treatment step 1: Microdermabrasion and ultrasound treatment
- (2) Treatment step 2: Cell Premium microneedling.

120 min.

MICRODERMABRASION & ULTRASOUND TREATMENT

This treatment combines two technologically advanced patents: a classic microdermabrasion as an intensive peeling to refine the skin's structure and activate cell turnover. It uses the very latest ultrasound technology to achieve deep-penetrating effects and stimulate lymphatic flow.

50 min.

CELL PREMIUM NEEDLING

Prepares the skin with an enzyme + AHA peeling for subsequent microneedling. Gentle rotations of the needling pens cause small micro-injuries, which stimulate the tissue to heal itself and regenerate. The depth of penetration can be individually adjusted. A final organic cellulose mask moisturises and seals the active ingredient complexes introduced beforehand in the ultrasound.

70 min.

SPECIAL NEEDLING ZONES

30 min.

CONTOUR LIFT

Active anti-aging treatment that combines 10-MHz ultrasound waves with skin-identical peptides for noticeably firmer contours.

- ✓ Reduces the depth of wrinkles and the formation of lines
- ✓ Improves the contours and the firmness of the tissue
- ✓ Counteracts the aging process of the skin

LANSERHOF LAB

Inspired by the “Lanserhof Glow” you get after a stay with us, our new facial care range combines medical expertise with traditional naturopathy. With highly effective detox and anti-aging ingredients for all skin types, the Lanserhof Skincare Routine offers effective, radiant and healthy skin care, making it an ideal addition to our spa.

ANANNÉ

ANANNÉ is a facial care brand that specialises in natural and effective products. The formulations have been developed by the latest research and are suitable for a variety of skin types, with particular value placed on pollutant-free ingredients and the highest quality standards.

LANSERHOF SPECIAL CARE

Exclusive Lanserhof Tegernsee brand, developed with dermatologists. Moisturising factors such as hyaluronic acid and vitamin A, E and C support and strengthen the immune system and improve the quality of the skin.

MBR

MBR is continually researching even more effective ingredient systems for demanding skin care on the frontiers of medicine. Its individual treatments are tailored to the different needs of the skin and follow the concept of “OPEN - SUPPLY - CLOSE”, resulting in deep regeneration and rejuvenation of the skin.

PHARMOS NATUR

Using 100% pure active ingredients based on fresh aloe vera, PHARMOS Natur offers a specially developed anti-aging care routine of PURE NATURE on the skin, supporting an even facial skin, radiantly beautiful eyes and a toned body.

UNIVERSKIN

Developed by doctors for doctors and specialized therapists, each skincare product is unique and offers a personalized solution. The philosophy behind this approach is to provide skincare with a medical foundation. By offering individualized options for active ingredients, concentration, and product application, the products are tailored specifically to each skin type and its current needs. This method emphasizes innovation and aims to improve skin function, aligning with the principles of functional dermatology and cosmetology.

BEWEI HANDS

The world's first professional and automatic treatment for younger and more beautiful-looking hands. Electromagnetic waves smooth and rejuvenate the skin without any pain.

CRYSTAL PRO CRYOLIPOLYSIS

Non-surgical methods that cool localised fat deposits, in a targeted and controlled way, down to temperatures of minus 12°C in order to crystallise and destroy fat cells, without impacting on the skin or surrounding tissue. The dead fat cells are removed via the lymphatic system.

EMSCULPT®

EMSCULPT® is the only non-invasive method for building muscle whilst also burning fat. Using HIFEM® technology, electromagnetic pulses are generated, triggering up to 20,000 artificial muscle contractions per sitting. These strengthen and increase the muscle fibres and release fatty acids to reduce fat.

ENDOSPHERES

Special, aesthetic treatment methods, also known as micro-vibration technology. A combination of vibrations, pressure and micro-vibrations are specifically used to exert massage effects on the skin and the tissue underneath.

JETPEEL™

An advanced and non-invasive skin treatment that aims to cleanse, peel, hydrate and regenerate the skin. Using a high-speed jet stream, special solutions are applied to the skin whilst dead skin cells and impurities are removed.

MICRODERMABRASION & ULTRASOUND

Microdermabrasion in combination with ultrasound is an advanced cosmetic treatment method to rejuvenate and improve the skin. This technology combines two different methods to effectively improve the structure and condition of the skin.

MICRONEEDLING

Microneedling is a revolutionary anti-aging treatment method for rejuvenating the skin. Tiny needles cause controlled micro-injuries to stimulate the body's own production of collagen and elastin, and activate micro-circulation.

STK

Effective, non-invasive lifting method and pain-free alternative to surgery without the downtime. Targeted pulses of heat stimulate the body's own synthesis of collagen, resulting in a tightening of the tissue. High-frequency ultrasound causes irritation in different layers of the skin, which immediately tightens the skin and further strengthens the connective tissue.

SHYLD™

Unique clinically tested concept developed by doctors and scientists to counteract and prevent cellulite and stretch marks. The therapy method combines shock waves, hyperthermia and lymphatic drainage to prevent cellulite and stretch marks with lasting effect and help firm up sagging skin tissue.

TDA

TDA stands for "transdermal application", the world's first pain-free and non-invasive therapy system. TDA treatments enable the upper layers of the skin to gently open for the transdermal delivery of selected cell-generating active ingredients, e.g. anti-aging active ingredients using highly concentrated oxygen down to the deepest layers of the skin.
