HEALTHY SKIN – NEW ENERGY

Our treatments and products focus on activating vital skin and body functions.

The skin regulates five essential functions which are responsible for our health, beauty and vitality:

IMMUNITY FUNCTION
ENERGETIC FUNCTION
VASCULAR FUNCTION
LYMPHATIC FUNCTION
STRUCTURAL FUNCTION

These important functions are activated by the phyto-energising **SALIN DE BIOSEL** product line as well as through bio-energetic and lymph-drainage massages, which provide new energy.

TDA

TDA stands for “transdermal application”: the world’s first dermatological-aesthetic therapy system that conveys active anti-aging substances to the deepest dermal layers in a pain-free, non-invasive procedure.

TDA combats the causes of signs of ageing and completely rejuvenates the skin.

To complement our well-known facial TDA treatments, we now offer new ampoule applications during treatment.

HYALDERM has an antibacterial effect on epidermal lesions and flaky, cracked skin. Improves skin elasticity and moisture, alleviates itching and redness.

MATRIX-A is a hypoallergenic formula to stimulate the skin’s own hyaluronproduction. It moisturises and gives the tissue more elasticity.

TDA SHINE & GLOW scalp and skin structure treatment
This treatment provides up to 95% more resistance and shine to the hair. It supports the regeneration of the scalp, prevents hair loss and dandruff and gives the hair more volume.

TDA CARE2GO

In this Seyo TDA treatment, the active ingredients selected for your individual skin type are atomised into microscopic drops with highly concentrated oxygen before being applied to the surface of the skin using a TDA applicator. The high oxygen partial pressure enables applying the active agents deep down in the dermal layers. The result: a visible reduction in facial wrinkles and perfectly nourished skin in a treatment tailored to individual requirements.

LIFTING WITHOUT SCALPEL AND WITHOUT SYRINGE – STK MULTILINE

STK technology is a highly effective, non-invasive lifting method for the face, neck and upper arms. In contrast to other lifting methods, the tissue is treated with targeted heat impulses. This treatment stimulates the body's own collagen synthesis and results in the tightening of the tissue.

The STK method is an effective and almost painless alternative to surgery. In addition, there is no downtime after the treatment and you can immediately return to your normal daily routine.

The STK treatment utilises the body's own repair mechanisms by employing high-frequency ultrasound to produce targeted irritations in various skin layers. As a result, the tissue contracts, which is perceived as tightening on the skin surface.

Your appearance immediately becomes younger and fresher. The connective tissue is activated and further strengthened in the course of the next months. The skin is tightened in a natural way for up to one year.

The world’s only non-invasive procedure for muscle building and fat burning

EMSCULPT® is the latest innovative step in non-invasive body shaping. It improves the body contour, muscle density and muscle volume, and burns fat – all at the same time. **EMSCULPT®** is the only alternative to surgical buttock lifting and offers non-invasive buttock enhancement.

EMSCULPT® uses HIFEM® (High-Intensity Focused Electro-Magnetic Field) technology. HIFEM® allows up to 20,000 artificial muscle contractions per session. These are called supramaximal contractions and cannot be normally achieved by spontaneous muscle movements. The musculature responds with a complete reshaping of its internal structure, i.e. the increase of myofibrils (muscle hypertrophy) and the formation of new protein strands and muscle fibers (muscle hyperplasia). The procedure thus leads to the growth of the muscle structure. The final results of the treatment can be seen after about 8 weeks.

- Intensive muscle building
- Lifting effect
- FDA certified
- Confirmed by independent studies

For modest improvement wishes, two treatments per zone are sufficient. For the best possible effects, four applications per selected zone should be performed. A treatment interval of at least one day should be observed.

SKIN REPAIR RAYMEDY TECHNOLOGY

Skin that once again boasts a distinctly fresher and firmer appearance and a face that, while visibly rejuvenated, still retains its flexibility and expressiveness – all achieved using exclusively natural methods and ingredients.

With Skin Repair Raymedy technology, LANS Derma offers a highly effective, holistic anti-ageing concept that enhances skin tone in all areas of the body. Treatments are precisely defined based on a computer-assisted meridian analysis: this ascertains your personal energy level and thereby sets the treatment duration, the use of micro-current frequencies, light therapy frequencies and vacuum drainages.

The therapy is applied solely on the basis of natural remedies and energy medicine. Body contours are defined and fat burning

processes activated through a sharp reduction in acid levels, meridian balancing as well as activation and regulation of lymphatic circulation. As a result, skin regains much of its former suppleness. Connective tissue structure is also improved, while natural fibroblast production is stimulated and the skin's inherent regenerative ability is enhanced.

Skin Repair Raymedy technology leaves your skin feeling completely new, and has a harmonising effect on mind and soul alike. A true experience.

MAKE-UP ADVICE FOR YOUR SKIN TYPE

Give your skin type genuine radiance. Although we are always surrounded by colours, and everyone has a particular tone, depth and shade of colours in their hair, eyebrows, skin and eyes, we can also make strong statements through our body shape.

Due to its great success, we use the Nine Factor Formula in conjunction with Beauty is Life products, allowing us to make clear differentiations and designate a skin type with regards to colour characteristics. Our objective is to assist you in selecting the right colour for you, based on knowledge instead of merely intuition.
